

Expert Highlights

- Widely experienced engineer.
- Appointed as a technical expert witness.
- Broad background in EPC contracting.
- Specialises in forensic investigation of engineering and design issues across a range of industries.
- Completed a LETAPAEWE accredited by Pearson Learning.

Julia Humpidge is an engineer and project manager with more than 30 years of construction and energy industry experience. She has acted as a technical expert on multiple occasions.

Julia has delivered independent technical expert opinion on engineering, design and project management matters for offshore wind and multipurpose buildings projects. Her expert appointments have concerned disputed values of up to £65 million.

Julia has a broad background in EPC contracting, from working as a process engineer in her early career to roles including project engineer, project manager, head of engineering department and vice president of project execution. She has extensive experience of delivering projects through the design, procurement, construction and commissioning phases; including developing and leading multi-disciplinary teams and carrying out project reviews, and the successful implementation of stage-gate processes.

Julia specialises in forensic investigation of engineering and design issues across a range of industries. She supports clients on projects ranging from onshore, offshore, upstream and downstream oil and gas to energy and industrial plants.

Julia holds a degree in chemical engineering and has completed an advanced professional award in expert witness evidence (LETAPAEWE).
