

Expert Highlights

- Chartered Quantity Surveyor.
- Proven as a credible expert witness under cross-examination.
- Specialises in productivity and disruption analysis.
- Provides clear analysis and concise reports on complex quantum matters.
- Acted as expert for disputed values in excess of \$2 billion.

Alastair Gray is a Chartered Quantity Surveyor with more than 25 years of experience. He has acted as a quantum expert on numerous occasions.

Alastair has been cross-examined in litigation, arbitration and adjudication on disputes with values in excess of \$2 billion. He has also been appointed to provide independent expert determinations across a variety of industries.

Alastair has a broad range of buildings, civil engineering and oil and gas project experience. He has worked for developers, contractors, subcontractors and consultants across the Middle East, Far East, Australia, and the UK including 15 years based in the United Arab Emirates.

Alastair specialises in productivity and disruption analysis. His expertise encompasses contractual, commercial, and claims related matters across all sectors of the construction industry.

Alastair is a fellow of the Chartered Institute of Arbitrators and a member of the Royal Institution of Chartered Surveyors. He holds a degree in management and design for building and a post-graduate diploma in construction law and arbitration.
