Professional

Services

[Engineering and Construction Delay and Disruption Analysis](#) [Engineering and Construction Quantum](#) Forensic Engineering, Architectural and Technical

Industries

Buildings, Mining and Metals, Oil and Gas, Power and Utilities, Production and Manufacturing, Transportation Infrastructure

Regional Experience

Americas, Asia, Europe, Oceania

Caryn Fuller is a civil engineer with over 20 years of experience. She has been appointed as an expert and assisted the named expert on numerous occasions.

Caryn has been cross-examined in arbitration, including giving concurrent evidence (hot-tubbing), and has assisted on disputes for projects with values of up to \$20 billion. Her expert work covers delay, quantum and technical disciplines for sectors ranging from buildings and infrastructure to industrial, power and utilities, mining and minerals, and oil and gas.

Caryn's professional experience includes mechanical and process engineering, construction, project management, project controls management, and construction claims analysis. She is a project and program leader with a proven track record in leading high-profile, large-scale global construction initiatives, with a focus on cost control, scheduling and reporting.

Caryn's expertise includes standard of care, scheduling issues, productivity issues, procurement delays, forensic document investigations, and cost analysis and damages. She has supported clients in arbitration (both international and domestic) and mediation, delivering expert analysis, reports and rebuttals.

Caryn holds a master's in civil engineering and is a certified professional with the Occupational Safety and Health Administration. She is a LEED accredited professional in building design and construction and has completed the American Bar Association Construction Law Trial

Academy Program.
