Expert Highlights

- Chartered Engineer.
- Proven as a credible expert witness under cross-examination.
- Specialist in forensic engineering work.
- Diverse background in the design of commercial structures.
- Understands the legal framework of disputes.

Helen Collie is a structural engineer with 15 years of construction industry experience. She has been appointed as a technical expert on more than ten occasions and has assisted the named expert numerous times.

Helen Collie enjoys a fantastic reputation in the market with peers and clients valuing her “robust technical expertise” and “ability to understand the commercial and legal sides”.

WWL Consulting Experts – Construction – Quantum, Delay & Technical – Future Leaders 2023

Helen has produced, or supported the production of, expert reports for claims regarding property insurance payments for earthquake and fire damage, issues of design liability and professional negligence for large sports and infrastructure projects, alleged poor workmanship, materials and specifications defects, and construction defects. She has been cross-examined in arbitration and is experienced in litigation support.

Helen has a background in the design and coordination of arts, education, healthcare and commercial structures. Her experience spans the commercial building design arena from high rise concrete structures in the Middle East, to adaptive reuse of existing London building stock, to complex steelwork arrangements.

Helen is a specialist in forensic engineering work. She covers subject matter ranging from structural steelwork (including connection design responsibility and workmanship), reinforced concrete design and defects, water leakages, seismic assessments (including for remediation works), and design liability issues.

Helen is a Chartered Engineer with a master’s in construction law and
