

Expert Highlights

- Over 15 years of international construction and consultancy experience.
- Appointed as an independent delay expert.
- Assisted the named expert in delay and project management related disputes.
- On-site experience in complex buildings and infrastructure projects.
- Fluent in English and Turkish.

Huseyin Karanci is a civil engineer with more than 15 years of experience. He has been appointed as a delay and programming expert 14 times and has assisted the named delay and project management experts on numerous occasions.

Huseyin has attended multiple hearings and has provided expert opinion in arbitration, adjudication and mediation for disputed buildings projects. He has assisted in analysis and report writing for infrastructure and oil and gas projects with values in excess of £1 billion, and responded to the opposing expert's reports.

Huseyin has worked at manager level for leading international contractors and consultancy firms across Europe, the Middle East, Asia, and Africa. His extensive hands-on experience includes the planning, design, procurement, construction, management, and analysis of complex construction projects ranging from airports, roads, rail, and bridges to residential and hotel towers, shopping malls, and offices.

Huseyin specialises in delay analysis, programming and construction management. He is proficient in conducting various types of delay, disruption, and productivity analyses to assess the impact of project issues.

Huseyin is a member of the Institution of Civil Engineers, the Chamber of Civil Engineers in Turkey and the Society of Construction Law (including as a committee member in Turkey). In 2020, he co-authored a chapter of the publication '*Dealing with Delay and Disruption on Construction Projects*', a practical guide to delay and disruption issues for construction professionals and is fluent in both English and Turkish.
