John H McTyre is a widely experienced civil engineer with more than 35 years of construction industry experience. He provides claims analysis and expert witness services and has provided expert testimony in various venues (more than 20 times) in English and Spanish. He has made more than 20 mediation presentations.

John McTyre is held in high regard for his top-tier delay analysis in high-value construction disputes both domestically and abroad.

WWL Consulting Experts – Construction – Quantum, Delay & Technical 2023

John is recognized and accepted as an expert in judicial proceedings and has testified in both federal and state courts, as well as in arbitral proceedings. He has delivered numerous depositions and has been cross-examined in matters of delay analysis and damages, schedule analysis and loss of productivity. John is also widely experienced in mediation and served the Department of Labor in the analysis of major claims for 20 years.

John provides dispute resolution services ranging from analysis and preparation of delay claims and related cost impacts to inefficiency studies and construction change entitlement issues. He has led teams in analyzing complex international and domestic disputes including airports, detention facilities, light rail, LNG plants, office buildings, power plants, pipelines, refineries, schools, sewer treatment facilities and stadiums
