

Construction 2023

Expert Information

Qualifications

BSc (Hons) Civil & Structural
Engineering
CEng

Expert Highlights

- Chartered Engineer with expertise across both civil and structural disciplines.
- Proven as a credible expert witness under cross-examination.
- Specialist in seismic engineering and design.
- Experienced resident engineer and assurance manager.
- Extensive practical experience of major project delivery from inception to completion.

Phillip Ebbatson is a Chartered Engineer with 45 years of construction industry experience including 35 years in the fields of civil and structural engineering. He has been appointed as a technical expert on more than 35 occasions.

Philip is very responsive and pragmatic in the manner he delivers his advice. He has a great deal of technical knowledge that he draws upon. He is keen to help and provides clear advice.

WWL Construction Expert Witnesses 2023

Phillip has acted as an expert witness and expert advisor for matters in litigation, arbitration, adjudication and mediation and has given expert evidence in the courts and at planning enquiries. His expert roles have covered a wide range of disputes across varied building and infrastructure projects including materials, design, construction and operational issues.

Phillip's background in civil engineering includes pavements, drainage, water supply and rail infrastructure. His structural engineering experience covers building structures, structural steelwork, structural concrete, masonry, foundations and seismic design.

Phillip specialises in seismic engineering and has supported clients regarding seismic design and codes of practice around the world; including Asia, Africa, Europe, the Middle East and the Americas. He brings extensive practical experience of major project delivery to his expert work along with considerable experience of all stages of the design process, on both civil engineering and building works.
